Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) Various methods of use such as improving cohesion between dermis and epidermis, toning up skin, slowing appearance of signs of skin aging, increasing collagen VII content in skin, etc... (Claims 17, 47),
- b) Various forms of ellagic components such as ellagic acid, ellagic acid salts, ellagic acid metal complex, monoether and polyethers, etc.. (Claims 17, 28-34, 47, 58-64),
- c) Various substances which promotes synthesis of extracellular matrix constituents of skin such as vitamins, tocopherol, xanthine, retinoids, various herbal extracts, etc.. (Claims 21-26, 51-57),
- d) Various antidandruff agents (Claims 37-39, 67-69).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species (a), claims 17, 47,

Species (b), claims 17, 28-34, 47, 58-64,

Species (c), claims 21-26, 51-57,

Species (d), claims 37-39, 67-69.

The following claim(s) are generic: 17 and 47.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Each method of use encompass various different process steps and clinical endpoint, thus, they are directed to divergent technical features,

Each group of the above mentioned chemical moieties encompass various components having different chemical, physical, and biological properties, accordingly, they do not share a special technical feature and are not so linked to form a single general inventive concept.

A telephone call was made to Ira Schultz on December 28, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

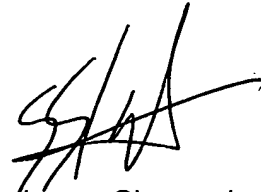

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh whose telephone number is 703-306-5400. The examiner can normally be reached on 8:30 am - 6:00 pm.
